Case Study: Japan 2011 Earthquake and Tsunami

<https://www.alevelgeography.com/japan-2011-earthquake-case-study/>

Add more arrows and annotate the map of Japan with as many facts about the causes and impacts of the Earthquake and following Tsunami. Use the link above and your own research.

Watch the documentary “Japans Tsunami Caught on Camera”

https://www.youtube.com/watch?v=oArd_9uZOnE

Read the following statements and agree or disagree with them. Explain your decision with evidence from the documentary and the facts you have gathered above.

“As a rich country Japan was better prepared than other countries would have been”

“No one knew what to do or where to go if an Earthquake occurred”

“There was nothing that the Japanese government could have done that would have helped reduce deaths and damage”
